## EXPLANATION OF TABULATED DATA ON FOLLOWING PAGES

Number of Teachers—In this column appears the number of teachers under the supervision of the superintendent, principal or head of department after whose name the number is found. The number after the superintendent's name includes all teachers, supervisors and principals, but not the superintendent; the number after the high school principal's name includes all high school teachers exclusive of the principal; the number after the principal of a ward building includes all the teachers in that building excluding the principal.

Enrollment—The number entered in this column indicates the enrollment in September, 1921, in grades and high school in the entire district.

The names appearing after subjects are those of high school teachers except in the cases of special departments such as art, music, etc. In these instances the teachers named may devote a part or all of their time to work in the elementary grades.

## FIRST CLASS DISTRICTS

(A first class district is one which has a population of eight thousand or more; it employs a superintendent who has had at least five years' experience in public school work; it is controlled by a board of seven trustees).

## THIRD CLASS DISTRICTS

(A third class district is one which has a population of less than one thousand; it employs a principal; it is controlled by a board of three members. Many third class districts have several rural schools in addition to the school listed below. As supervision over these rural schools is almost entirely in the hands of the county superintendents, they are not included here. Of the following, Grass Range, Musselshell and Thompson Falls maintain dormitories, as does also the Austin school near Malta in Phillips county. Districts showing no high school enrollment do not maintain high schools.)

## COUNTY HIGH SCHOOLS

(A county high school is under the control of a principal; it is administered independently of any school district; funds for its upbuilding and maintenance are derived from a uniform county levy; the board of trustees consists of seven members, of whom the county superintendent is one, and the remaining six are appointed by the county commissioners).

## STANDARDS ADOPTED BY THE STATE BOARD OF EDUCATION FOR ACCREDITING MONTANA HIGH SCHOOLS

### December 19, 1921.

1. The time for which schools are accredited shall be limited to one year.
2. Every accredited high school in the state shall keep a permanent record of each pupil's work and attendance.
3. Every accredited high school must teach a minimum of 170 days net in a school year.
4. No school shall be accredited for four years of work which does not require fifteen units for graduation. Sixteen is recommended.
5. No school shall be accredited when any teacher or teachers including grade teachers, are selected without the recommendation of the superintendent of such school; in case there is no superintendent, the recommendation of the high school principal shall prevail.

6. It is recommended that the minimum attainment of teachers of academic subjects shall be equivalent to graduation from a standard college requiring the completion of a four year course of study of 120 semester hours in advance of a standard four year high school course. It is further recommended that the minimum professional training of teachers of any subject shall be at least eleven semester hours in education. No school shall be accredited which does not comply with the laws of the State of Montana regarding the certification of teachers.

7. The number of daily periods of class room instruction given by each teacher should not exceed five, each to extend over at least forty minutes in the clear. In extreme cases, on application, permission may be given for seven recitation periods per day of either high school or high school and grade classes for any high school teacher.

8. No school shall be accredited for four years of high school work whose teaching force for the high school is fewer than two teachers for full time and one teacher for half time. No school shall be accredited for three years of high school work whose teaching force for the high school is fewer than two teachers for full time. No school shall be accredited for two years of high school work where the work given requires less than the full time of one teacher.

9. The efficiency of instruction, acquired habits of thot and study, the general intellectual and moral tone of the school are paramount features, and therefore only schools which rank well in those particulars, as evidenced by rigid thoro going, sympathetic inspection shall be considered eligible for accrediting.

10. No high school shall be accredited unless high standards of work and attainment are maintained in the elementary schools of the district. Especially important are the quality of instruction, the certification of teachers, the number of pupils per teacher and the number of teachers in the grades as compared with the number of teachers in the high school.

11. Admittance to advanced standing of pupils from unaccredited schools usually tends to lower the standards both of the school from which they come and of the school which they enter. It is recommended that this practice be discontinued except with unusually well qualified students.

12. Every fully accredited high school shall maintain at all times at least three years of English and require not fewer than three units of English in a four year course. Four units of English as a requirement for graduation is recommended. The Board will discourage the placing of more than one hundred students per teacher in English classes.

13. A year's work in American history and government equivalent to one unit is required of every high school accredited for three or four years. No student who has not earned one unit of credit in American history and government may graduate from a three or four year accredited high school.

14. No school employing fewer than four high school teachers for full or part time will be accredited for more than two laboratory sciences given during any school year, except that high schools employing one teacher for full or part time will not be accredited for more than one laboratory science a year.

15. No school employing fewer than four teachers of academic subjects shall be accredited for more than one foreign language.

16. In academic subjects a unit of credit represents five recitation periods of not less than forty minutes each per week for a term of not less than thirty-six weeks; in science a unit of credit represents not less than seven periods of work a week, four of which shall be laboratory work; in manual arts, bookkeeping, typewriting, home economics, etc., ten class periods a week shall be required for a unit of credit.

17. The laboratory and library facilities shall be adequate to the needs of instruction in the subjects taught.

18. The location and construction of the buildings, the lighting, heating and ventilation of rooms, the nature of laboratories, corridors, closets and water supply; school furniture, apparatus, methods of cleaning shall be such as to insure hygienic conditions for both pupils and teachers.

19. No high school shall be accredited for four years of work which has fewer than two recitation rooms in addition to the study room.

20. No accredited school with limited teaching force shall be permitted to add without the permission of the accrediting officer classes or courses which are not accredited.

21. It will be the policy of the state board not to accredit high schools for any work done in which the per capita cost of educating pupils is abnormally high. Especial attention in this connection is directed toward subjects, departments, and years of high school work in which few pupils are enrolled.

22. Where a district high school shares the division of high school money from the county and the work of any teacher, subject, department, or year of high school work is not accredited the proportion which the enrollment, in such class or classes bears to the total class enrollment shall be deducted from the total average daily attendance.

23. **Eligible High School Students.** (1) All pupils who have passed successfully the state eighth grade examination; (2) all pupils who have passed successfully the eighth grade examination given by the superintendent of schools in systems permitted to give their own examinations; (3) all pupils sixteen years of age or over who desire to enter for special courses and who have passed successfully an examination given jointly by the county superintendent of schools and the principal of the high school.

In apportioning county moneys for the support of accredited high schools of any county, the county superintendent of schools shall count the attendance of eligible high school students who have been admitted under 1 and 2. He shall count those admitted under 3 only when they shall have been in attendance fifty days.

24. Class C shall include all schools accredited for less than four years' work or accrediting with fewer than three teachers.

Class B shall include all schools doing four years' work which are not included in Class C, and which have fewer than five teachers of academic subjects except as otherwise noted.

Class A shall include all schools where the teaching force exceeds four teachers, provided that it ranks well in:

1. Organization.
2. Personality, scholarship and professional spirit of teaching force.
3. Laboratory and library facilities.
4. School plant, (including buildings and grounds) provided that a school having four teachers and ranking high in the four points above mentioned may be included in Class A.

25. The state board of education shall establish a probationary list of high schools at its meeting in July, 1922, consisting of such high schools as do not fully meet the foregoing standards for accrediting. Any high school whose full and complete report is not filed in the office of the superintendent of public instruction before the July meeting of the state board of education may also be placed on the probationary list.

### TEACHERS' RETIREMENT SALARIES

In accordance with an act of the legislature approved March 8th, 1915, teachers who have taught twenty-five years, the last fifteen years of which have been in Montana, may retire on an annual retirement salary of $600.

School officials are required to deduct one dollar every month from the salary of every teacher in their employ for the benefit of the retirement salary fund. This applies to all teachers except those actually in the employ of Montana schools at the date of the approval of the act, who were allowed till January 1st, 1916, to decide whether to avail themselves of the law or not.

**Public School Teachers' Retirement Salary Fund Board**

Chairman—May Trumper, Superintendent of Public Instruction.
J. W. Walker, State Treasurer.
Wellington Rankin, Attorney General.

---

### STATE FLAG

The state flag of Montana is a flag having a blue field, with a representation of the Great Seal of the State in the center, and with golden fringe along the upper and lower borders of the flag.

---

### STATE FLOWER

The Montana state flower, adopted by act of the Legislative Assembly, approved February 27, 1895, is the Bitter Root (Lewisia rediviva).

---

### STATE MANUALS

Every school is furnished by the county superintendent with a copy of the school laws of the state and a manual of the state course of study. Copies of the school law may be purchased from The Independent Publishing Company, Helena, for fifty cents. Rural courses or courses for city elementary schools may be purchased from the same company at $1.00 a copy.

---

### SALARIES AND LENGTH OF TERM

Town schools open in September, and remain in session nine or ten months. Rural schools open, in different localities, at almost every season. Their terms vary from six to nine months. The Department of Public Instruction cannot give any list of rural schools that will be in session during the summer. Such schools are found in many counties. Local conditions and judgment of trustees control the establishment of such schools.

Salaries of teachers in rural schools range from about $600 to $1400 annually; in towns and cities about $900 to $1800.

Salaries of superintendents, principals and high school teachers are shown in detail on foregoing pages.

No general statement can be made in regard to cost of teachers' board, as the variation is great in different localities.

---

#### Demand for Teachers

The State Department of Public Instruction receives so many inquiries in regard to the demands for teachers in the state, that an individual reply to each is hardly possible. In a certain sense there is a scarcity of teachers in Montana, that is, it is necessary every year to draw in a considerable number of teachers from other states. It is unusual, however, that a city school has any difficulty in finding teachers. The exceptions are chiefly in rural sections. There is no demand in high schools and very little in city and village elementary schools for teachers who are not graduates of standard normal schools or colleges.

---

#### Assistance in Placing Teachers.

The state department does not maintain a formal bureau of recommendations, but receives many applications and makes frequent recommendations. Application blanks will be sent to prospective teachers upon request. Teachers desiring to make applications thru agencies will find all leading agencies doing business in Montana.

## ERRATA—OMISSION PAGE 42.

The fact that a school is on the probationary list does not deprive its graduates of the privilege of college entrance without examination nor the school of its share in the county tax for high schools.

## MISCELLANEOUS

### REGARDING HOMESTEAD LANDS

The Department of Public Instruction has no official information in regard to government lands available for homestead entry. Persons interested should consult a United States Land Office. A few homesteaders in Montana do find schools near enough to their homesteads to make it possible for them to live on their claims while teaching. Naturally, such opportunities must be very rare indeed.

---

### FURTHER INFORMATION

A circular of information pertaining to teachers' certificates will be sent to any address upon request.

Any reasonable inquiries not covered by the information given above will be cheerfully answered.

Superintendent of Public Instruction,
